

WHICH TAMPER-EVIDENT SOLUTION IS RIGHT FOR YOUR PRODUCT?

Tamper-evident packaging provides visible proof that a package has been opened or compromised. The three most common approaches are wafer seals, shrink bands, and shrink sleeves, each offering unique advantages depending on your package design, branding goals, production requirements, and budget.

	 WAFER SEALS	 SHRINK BANDS	 SHRINK SLEEVES
 Branding & Shelf Appeal	• Preserves existing package graphics • Minimal visual impact	• Minimal impact on existing labels • Maintains existing package design	• Nearly 360° branding coverage • Premium appearance • Strong shelf differentiation • Supports frequent design changes
 Packaging Format	• Best for cartons, folding boxes, and secondary packaging • Applied across carton flaps or package openings • Does not alter primary package appearance	• Best for bottles, jars, and containers with closures • Applied around cap and neck • Provides tamper evidence at the opening point	• Best for bottles and uniquely shaped containers • Covers part or all of the container • Combines decoration and tamper evidence
 Sustainability & Material Usage	• Lowest material consumption • Minimal packaging addition	• Uses less film than full-body sleeves • Lower material use than shrink sleeves	• May support recyclable packaging systems depending on material selection
 Integration & Equipment Requirements	• No shrink tunnel required • Lower energy demand • Easy integration into existing production lines	• Easy integration into existing production lines • Minimal line modifications	• Easy integration into existing production lines
 Tamper-Evidence Performance	• Highly visible seal across opening • Security features available (VOID messaging, destructible materials)	• Clear indication when closure is opened • Direct protection at cap or lid	• Full package tamper evidence option • Tamper protection plus branding in one solution

QUICK DECISION GUIDE

- Choose **Wafer Seals** if...

 - Your products are sold in cartons or folding boxes
 - Sustainability and low material use are priorities
 - You want tamper evidence without changing package graphics
- Choose **Shrink Bands** if...

 - You need tamper evidence on a bottle closure
 - You already use pressure-sensitive labels
 - You want the easiest tamper-evident upgrade
- Choose **Shrink Sleeves** if...

 - Branding and shelf impact are priorities
 - You have uniquely shaped containers
 - You want decoration and tamper evidence in a single label
